Mavin Technologies Opens a New Technical Services Facility to Keep Pace with Customer Growth

Situated in Virginia, the Facility Strengthens the Capacity to Help Customers with Mavin Turnkey Solutions-in-a-Box, US Technical Support, and Professional Services.

Rochester, NY - December 12, 2024 - Today, Mavin Technologies announced opening a new technical services facility centrally located in Virginia.

Tim Seibold, President, said, “Our new facility bolsters Mavin’s capacity to help our customers because of increased expectations for Mavin Solutions-in-a-Box, US based technical support, and professional services.” Tim added, “Many customers these days expect much more from their OEM vendors, our investments here will enable us to keep pace with trending demands.”

About Mavin Technologies

The Mavin Software platform is a fully featured and integrated access control system with modules for identity management, credentials issuance, intrusion alarm monitoring, event scheduling, interactive graphical maps, real-time device status monitoring, asset tracking, IoT enhancements, and reports.

With a focus on software innovations, Open API based hardware and software integrations, Mavin has been enhanced with customer driven features for over two decades. Many mid-market to enterprise class customers have been using Mavin Integrated Security for 20+ years.

Mavin Technology’s go-to-market strategy continues to be centered on customers with a keen concentration on their success. We strive to live a customer-first culture, a family-style work environment focusing on employees and people in general, a good old-fashioned hard work mentality, being great listeners, and staying open to feedback from all.
